Dear Dr. Pracek:

I have received the executed form assigning your rights in the invention entitled "Casein Kinase 1 Epsilon Gene and Sleep in Humans" and "Casein Kinase 1 Delta Gene and Sleep in Humans" which is set forth on the invention disclosure dated September 23, 2002 (the "Invention"). The Institute has adopted the practice of appointing you as the Institute's agent for the purpose of assigning its rights in the Invention to the University of Utah (the "University"), as required under the collaborative arrangement between the Institute and the University. Enclosed with this letter is an executed document appointing you as the Institute's agent for this purpose. I have sent the original assignment(s), this letter and its enclosure to Rachel Tennyson at the University.

As you are probably aware, you will be asked to execute an assignment of rights to the University in the event a patent application is filed with respect to the Invention. To ensure that the Institute's rights are properly assigned to the University, it is important that you have the enclosed executed document with you when you execute that assignment and that, after your signature, you write in "for himself and as agent for the Howard Hughes Medical Institute." If you have any questions at all about this procedure or your role in it, please contact me.

Sincerely,

Sue S. Ohata
